

BELL OAKS

Due Date:

September 6, 2019

SUMMER

Entering
8th Grade

This summer you will have some choice as to how you complete your summer work.

On the attached "Math Menu" you will see a list of topics you learned in 7th grade as well as different activities listed underneath each topic.

The amount of points each activity is worth is listed in parenthesis after the assignment.

- Each assignment you complete will add the associated amount of points onto your final summer skills grade.
- You can complete as many assignments as you would like to increase your final packet grade.
- The highest grade we will put into the grade book is a 105!
- You **MUST** complete at least one IXL activity from each skill area (smart score of at least an 80).
- You **MUST** complete at least one worksheet option.
- You **MUST** complete at least one "project" that we can use for a hallway display in September.

Please remember this packet grade will count as your first test grade for the first marking period.

While we are leaving the total number of activities you complete and points you earn up to you, you should complete enough that you would be happy with the final grade going in the gradebook as a test.

The skills and activities listed on the "Math Menu" will be tested upon your return to school in September. This test will count as your second test grade for the first marking period.

Completing the activities listed to the best of your ability will help you prepare for the test and keep your skills fresh and ready for 8th grade!
